Fall 2014 Project Plan: Week 6 (Present) – Finals Week

NOTE: Schedule vague as of now. Will progressively become more specific with each passing week.

Week 6

- Finish UI mockups
- Continue implementing reading .apkg and .file code on developmental build; back-end code
- Start gathering methods for user testing plan

Week 7

- Continue implementing reading .apkg and .file code on developmental build; back-end code
- Start implementing UI design (from mockups) on developmental build
- Refine methods for user testing plan

Week 8

- Continue implementing reading .apkg and .file code on developmental build; back-end code
- Continue implementing UI design (from mockups) on developmental build
- Finalize methods for user testing

Week 9

- Continue implementing reading .apkg and .file code on developmental build; should have some type of “viewable” deliverables by now
- Continue implementing UI design (from mockups) on developmental build
- Finalize methods for user testing
- Start finding potential users for user testing

Week 10

- Finish implementing reading .apkg and .file code on developmental build; should have some type of “viewable” deliverables by now
- Finish implementing UI design (from mockups) on developmental build
- Continue finding potential users for user testing

Finals Week

- Final demo and presentation for sponsors, professor, and TA
