## **Project Plan Implications**

Each member of our team is taking at least 12 units (and up to 20 units) this quarter, and all of us have at least one other project course. Based on our Gantt chart, each team member will have a lot of other work on their hands (both class and work wise), and possibly even more than expected since not all of our classes have up-to-date definite schedules. For 191B this quarter, much of the work will have to be done individually (in that we can't all be present together at the same time) and each individual will be responsible for completing his or her deliverables on time (be it hard assignment deadlines or coding development on the website). Our team will still make it a point to meet with each other, but won't be able to meet as an entire group with everyone present as often as we were compared to last quarter.
